FY 17 TAKEAWAYS

- 1** 1P Sales on **Core Categories** «Family Capex» more resilient to price pressure. Last mile services and warranties grew at the expected attach rate allowing to maintain category leadership where full-service is key to customer satisfaction.
- 2** **Long Tail Categories**, non-service driven, can be managed and become profitable by **accelerating shift to 3p Marketplace** with a beneficial effect on reduced inventory, higher GM and lower marketing expense. Shift gradually started towards year end 2017.
- 3** After deploying the new **Fulfilment Center** and **SAP** to gain efficiency, **it is now time to reduce the cost base in order to be able to cope with weak market conditions and redesign a leaner management organization.**
- 4** Turbulence in the Offline Players scenario could be a sign of an **acceleration of the shift to online**, because the **different cost structure** begins to show.

TURNING 2017 LEARNINGS INTO VALUE

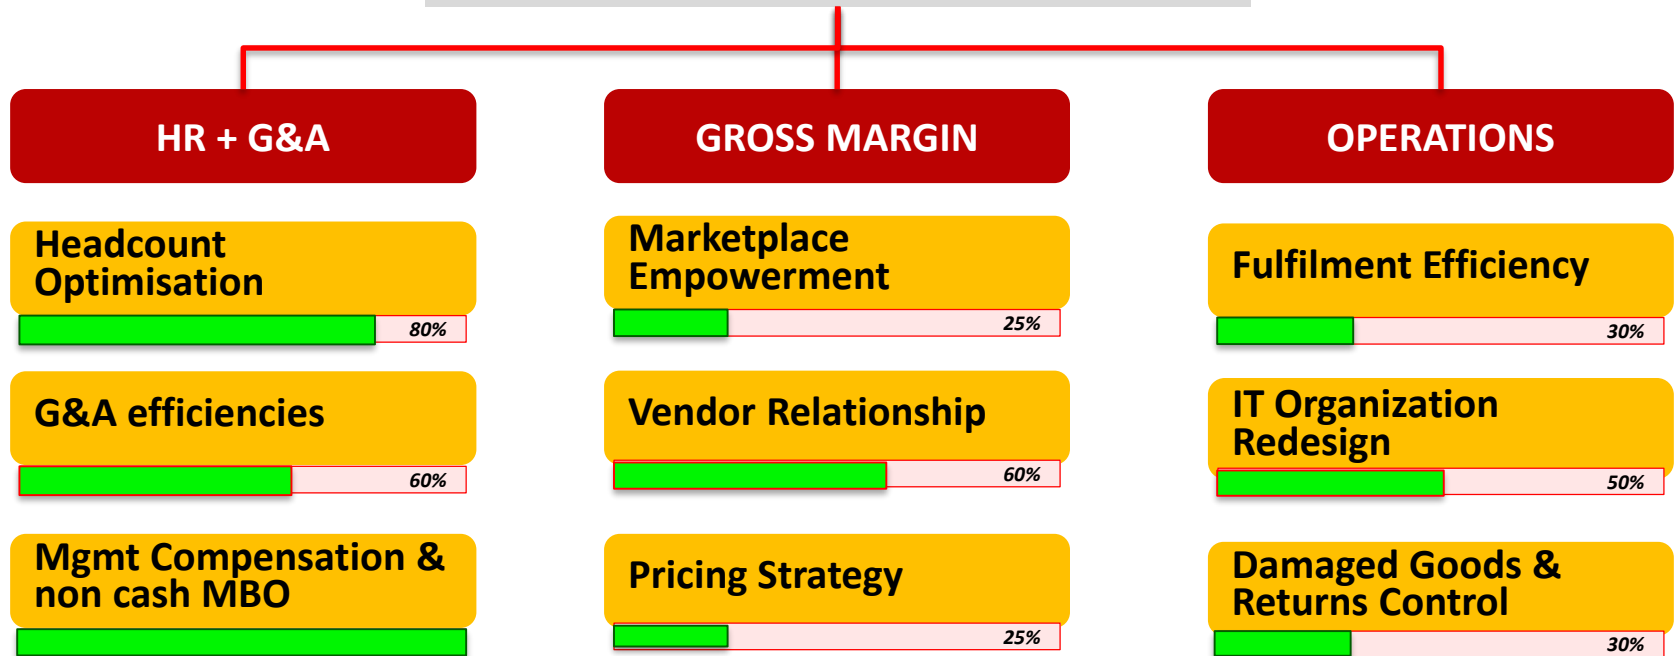

- 1 **ePRICE assets** (big data, services and network) are a strong advantage in categories where our clients devote time and effort to the purchase process: the “**Core Categories**”.
- 2 **Core Categories** are more protected from price pressure because of the investment level required to full-service the client's needs.
- 3 **In Long Tail Categories**, where customer choice is driven by price, product availability and fast delivery, Amazon excels and all many small players compete too.
- 4 Shift to our **3P Marketplace** can be accelerated to match customers demand in **Long Tail Categories** to the merchants who can leverage our customer base and distribution network.
- 5 **By concentrating** ePRICE on Core Categories we are able to reduce the cost base, reduce inventory and focus our marketing effort where we can achieve an **higher GM**.
